

Dasuni Wijesuriya

Data Analytics | Business Intelligence | Power BI | SQL

wijesuriyadasuni@gmail.com | +94 71 9931314 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | Colombo, Sri Lanka

PROFESSIONAL SUMMARY

Motivated dual-degree undergraduate in Information Technology (SLIIT) and Physical Science – Mathematics, Applied Science & Computer Science (University of Ruhuna), with hands-on experience in business intelligence, data analytics, Power BI dashboard development, SQL, reporting, and data validation through academic projects and my internship at SriLankan Airlines.

WORK EXPERIENCE

IT Intern – Data & Digital Systems | SriLankan Airlines, Katunayake *May 2025 – Nov 2025*

- › Performed API testing and validation using Postman, applying software testing methodologies to ensure reliable data integration across internal and external platforms.
- › Developed and maintained interactive Power BI dashboards and reports, writing and optimizing SQL queries for data extraction, transformation, and visualization to support business decision-making.
- › Collaborated with cross-functional stakeholders to gather requirements, translate them into data models, and deliver iterative reporting solutions.
- › Supported backend data ingestion pipelines and contributed to technical documentation, working independently to meet sprint-level delivery targets.
- › Gained practical exposure to enterprise-scale digital systems, including multi-source data integration and automation of reporting workflows.

EDUCATION

BSc (Hons) Information Technology – Specializing in IT | SLIIT, Sri Lanka *Jun 2022 – 2026*

BSc Physical Science (Mathematics, Applied Science & Computer Science) | University of Ruhuna, Sri Lanka
Oct 2023 – 2026

PROJECT EXPERIENCE

AI-Powered Learning Analytics & Intervention System *Jun 2025 – Jun 2026*

Flutter, Firebase, Python, ML, Power BI

Research Project — AI tool development with iterative build cycles and stakeholder testing.

- › Built an AI-powered application integrating Machine Learning models (Logistic Regression, ANN) to automate prediction of learning engagement — direct experience applying AI tools to solve real problems.
- › Developed the full software lifecycle end-to-end: requirements, design, coding, testing, and iteration — using Python, Flutter, and Firebase across mobile and cloud platforms.
- › Implemented automated data collection and processing pipelines; applied feature engineering and model testing to validate prediction accuracy.
- › Produced interactive Power BI dashboards and presentations, translating machine learning outputs into actionable business insights for non-technical stakeholders.

Online Garbage Management System *Feb 2024 – Jun 2024*

MERN Stack (MongoDB, Express, React, Node.js)

- › Built and tested a full-stack web application from scratch using the MERN stack — hands-on coding across frontend, backend, and database layers.
- › Developed and tested RESTful APIs using Postman, applying systematic testing methodology to ensure robust and reliable backend performance.
- › Designed MongoDB schemas and implemented CRUD operations; created a responsive React frontend with seamless navigation for multiple user roles.

Android Note-Taking Application | Kotlin / Android Studio *Apr 2024 – May 2024*

- › Independently designed and built a complete Android app in Kotlin, applying Android development best practices and delivering an intuitive, user-friendly UI/UX.

Online Teacher Training System | PHP / MySQL / VS Code *Feb 2023 – Jun 2023*

- › Developed a web-based platform integrating frontend and backend technologies with full CRUD functionality and user management using PHP and MySQL.

TECHNICAL SKILLS

Programming Languages: Python, R, Java, JavaScript, PHP, C, C++,

Testing & QA: API Testing (Postman), Software Testing Methodologies, Debugging, Validation, Playwright

AI & Automation: Machine Learning (Python, Logistic Regression, ANN), Power BI, AI Tool Integration

Back-End: Node.js, Express.js, PHP, Java, RESTful APIs, Firebase, JSON

Front-End: React, HTML5, CSS3, JavaScript, Tailwind CSS, Flutter

Databases: SQL, MySQL, MongoDB, SQL Query Optimization, Data Pipelines

Dev Tools: VS Code, Git / GitHub, Postman, Android Studio, Figma, PyCharm, XAMPP

Analytics Tools: Power BI, Microsoft Excel, SQL

Principles: OOP, SDLC, STLC, Agile Collaboration, UI/UX Design, Independent Delivery

RELEVANT COURSEWORK

Financial Mathematics, Statistics, Machine Learning, Database Systems, Software Engineering

CERTIFICATIONS

- › Machine Learning Essentials for Business and Technical Decision Makers — AWS, 2025
- › Introduction to Generative AI – Art of the Possible — AWS, 2025
- › Describe Azure Identity, Access, and Security — Microsoft Learn, 2025

ACHIEVEMENTS & COMPETITIONS

- › 1st Place – PearlHack 3.0 International Women's Hackathon — Sabaragamuwa University of Sri Lanka, 2025
- › 2nd Runner-Up – Road to Rush Coder 3.0 Hackathon — University of Ruhuna, 2025
